Author Index Volumes 164–165 (2004)

- Abad, P.** and **J.P. Suárez**, Bi-factorial analysis for resolution of GPS equations 1– 10
- Abd-el-Malek, M.B., M.M. Kassem** and **M.L. Mekky**, Similarity solutions for unsteady free-convection flow from a continuous moving vertical surface 11– 24
- Alobaidi, G.**, see **Mallier, R.** 543–554
- Amirat, Y.** and **O. Bodart**, Numerical approximation of laminar flows over rough walls with sharp asperities 25– 38
- Bacchelli, S.** and **S. Papi**, Filtered wavelet thresholding methods 39– 52
- Berres, S., R. Bürger** and **K.H. Karlsen**, Central schemes and systems of conservation laws with discontinuous coefficients modeling gravity separation of polydisperse suspensions 53– 80
- Berrut, J.-P.** and **H.D. Mittelmann**, Adaptive point shifts in rational approximation with optimized denominator 81–92
- Bielecki, A.** and **J. Ombach**, Shadowing property in analysis of neural networks dynamics 107–115
- Bielecki, A., D. Jabłoński** and **M. Kedzierski**, Properties and applications of weakly nonlinear neurons 93–106
- Bodart, O.**, see **Amirat, Y.** 25– 38
- Bors, D.** and **S. Walczak**, Stability of nonlinear elliptic systems with distributed parameters and variable boundary data 117–130
- Bourchtein, A., V. Kadychnikov** and **L. Bourchtein**, Some properties of the vertical structure matrices of the atmospheric models 131–144
- Bourchtein, L.**, see **Bourchtein, A.** 131–144
- Brugnano, L.** and **C. Magherini**, The BiM code for the numerical solution of ODEs Dedicated to Prof. J.C. Butcher on the occasion of his 70th birthday 145–158
- Bujanda, B.** and **J.C. Jorge**, Efficient linearly implicit methods for nonlinear multidimensional parabolic problems 159–174
- Bultheel, A., M. Van Barel** and **P. Van gucht**, Orthogonal basis functions in discrete least-squares rational approximation 175–194
- Bultheel, A.**, see **Van Deun, J.** 749–762
- Bürger, R.**, see **Berres, S.** 53– 80
- Campigotto, C.**, see **Smirnov, Y.F.** 643–660
- Chen, K.**, see **Hussein, A.** 419–430
- Clavero, C.** and **J.L. Gracia**, HODIE finite difference schemes on generalized Shishkin meshes 195–206
- Danilin, A.N., D.V. Snegovski** and **D.B. Volkov-Bogorodski**, On implicit algorithms of continuation method with applications to dynamic systems 207–224
- De Bonis, M.C., C. Frammartino** and **G. Mastroianni**, Numerical methods for some special Fredholm integral equations on the real line 225–243
- Decamps, M.**, see **Goovaerts, M.** 337–364
- Demetriou, I.C.**, A theorem for piecewise convex–concave data approximation 245–254
- De Schepper, A.**, see **Goovaerts, M.** 337–364
- Dieci, L., C. Elia** and **L. Lopez**, Smooth SVD on the Lorentz group with application to computation of Lyapunov exponents 255–264
- Dmytryshyn, R.I.**, The multidimensional generalization of g-fractions and their application 265–284
- Domingo-Ferrer, J.** and **V. Torra**, Disclosure risk assessment in statistical data protection 285–293
- Dostál, Z.**, see **Haslinger, J.** 387–408
- Dragut, A.B.**, A weakly monotonic backward induction algorithm on finite bounded subsets of vector lattices 295–306
- Elia, C.**, see **Dieci, L.** 255–264
- Frarmartino, C.**, see **De Bonis, M.C.** 225–243
- Ganesh, M.**, Fully discrete spectral methods for boundary integral equations on slender spheroids 307–322
- Ghelardoni, P., G. Gheri** and **M. Marletta**, A quasi-extrapolation procedure for error estimation of numerical methods in Sturm–Liouville eigenproblems 323–335
- Gheri, G.**, see **Ghelardoni, P.** 323–335
- Goovaerts, M., A. De Schepper** and **M. Decamps**, Closed-form approximations for diffusion densities: a path integral approach 337–364
- Gracia, J.L.**, see **Clavero, C.** 195–206
- Gu, C.**, Matrix Padé-type approximant and directional matrix Padé approximant in the inner product space 365–385

- Harada, K.**, see **Niki, H.** 587–600
- Haslinger, J.**, **R. Kučera** and **Z. Dostál**, An algorithm for the numerical realization of 3D contact problems with Coulomb friction 387–408
- Hernández, M.A.** and **M.J. Rubio**, A modification of Newton's method for nondifferentiable equations 409–417
- Hussein, A.** and **K. Chen**, Fast computational methods for locating fold points for the power flow equations 419–430
- Jabłoński, D.**, see **Bielecki, A.** 93–106
- Jorge, J.C.**, see **Bujanda, B.** 159–174
- Junghanns, P.**, Optimal control for a parametrized family of nonlinear Cauchy singular integral equations 431–454
- Kadychnikov, V.**, see **Bourchtein, A.** 131–144
- Karlsen, K.H.**, see **Berres, S.** 53–80
- Kassem, M.M.**, see **Abd-el-Malek, M.B.** 11–24
- Kedzierski, M.**, see **Bielecki, A.** 93–106
- Kouibia, A.** and **M. Pasadas**, Construction of surfaces by discrete variational splines with parallelism conditions 455–467
- Kučera, R.**, see **Haslinger, J.** 387–408
- Laouafa, F.** and **P. Royis**, An iterative algorithm for finite element analysis 469–491
- Limić, N.** and **M. Rogina**, Numerical solutions of Dirichlet problem for elliptic operator in divergence form with a right-hand side measure 493–516
- Lopez, L.**, see **Dieci, L.** 255–264
- Maazouz, A.**, **A. Mikelic**, **J. Pousin** and **E. Zeltz**, Fluid injection model without surface tension for resins in thin molds 517–528
- Magherini, C.**, see **Brugnano, L.** 145–158
- Malfliet, W.**, The tanh method: a tool for solving certain classes of nonlinear evolution and wave equations 529–541
- Mallier, R.** and **G. Alobaidi**, Interest rate swaps under CIR 543–554
- Marletta, M.**, see **Ghelardoni, P.** 323–335
- Mastroianni, G.**, see **De Bonis, M.C.** 225–243
- Mastronardi, N.**, see **Van Camp, E.** 731–747
- Matos, J.**, **M.J. Rodrigues** and **P.B. Vasconcelos**, New implementation of the Tau method for PDEs 555–567
- Matsuo, T.**, see **Sugihara, M.** 673–689
- Mekky, M.L.**, see **Abd-el-Malek, M.B.** 11–24
- Mikelic, A.**, see **Maazouz, A.** 517–528
- Milovanović, G.V.** and **M.M. Spalević**, Error analysis in some Gauss–Turán–Radau and Gauss–Turán–Lobatto quadratures for analytic functions 569–586
- Mittelmann, H.D.**, see **Berrut, J.-P.** 81–92
- Morimoto, M.**, see **Niki, H.** 587–600
- Niki, H.**, **K. Harada**, **M. Morimoto** and **M. Sakakihara**, The survey of preconditioners used for accelerating the rate of convergence in the Gauss–Seidel method 587–600
- Ombach, J.**, see **Bielecki, A.** 107–115
